

## Mounting Panel and Sun Shade for Sunny Boy™ 1800/2500W Inverters

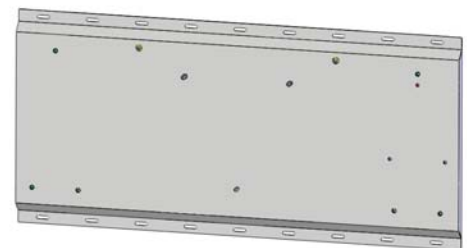

Two Seas Metalworks (TSM) announces its **NEW Meter Beater™ Back Plate** and **SB Shading Roof™**, ideal for Sunny Boy™ 1800/2500W Inverter installations.

The Meter Beater™ Back Plate from TSM has pre-installed threaded inserts for all component mounting locations. It is designed to mount a Sunny Boy™ 1800/2500W Inverter and both DC and AC Disconnect Switches (Square D 30 Amp models). Constructed from high strength, marine grade aluminum, it provides a professionally installed appearance far superior to the typical painted plywood or Uni-strut systems found on most installations.

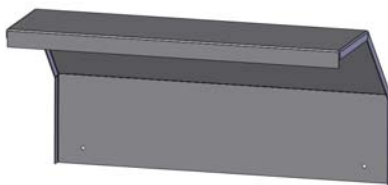

*Two Seas Metalworks' time and labor saving products go directly to your installation bottom line and provides the following:*

- Professional and finished appearance
- Cuts down on installation time and *your overall cost*
- Allows for pre-assembling components
- Includes all stainless steel hardware
- Meets *SMA installation criteria* and *NEC requirements*
- Sturdy design for installing in *any type of environment*
- Custom powder coating colors available (call for info)
- Models to hold 2 and 3 Inverters will be available soon!

Meter Beater™ Back Plate

TSM's SB Shading Roof™ for outside mounting protects the inverter from direct sunshine as recommended per SMA when used with our Meter Beater™ Back Plate or without.

SB Shading Roof™

- Professional and finished appearance
- Provides protection from direct sunlight
- Designed to be used with our Meter Beater™ Back Plate or stand alone with 16 inch center mounting holes
- Powder coated aluminum construction

The **Meter Beater™ Back Plate** and **SB Shading Roof™** can save the installer 2-3 hours of installation time and provides a complete and truly professional looking system!

**Call 800.223.9523 today for pricing information at your discount!**
