

# Ground Trac™

Clamping System Patent #6,360,491

## Benefits

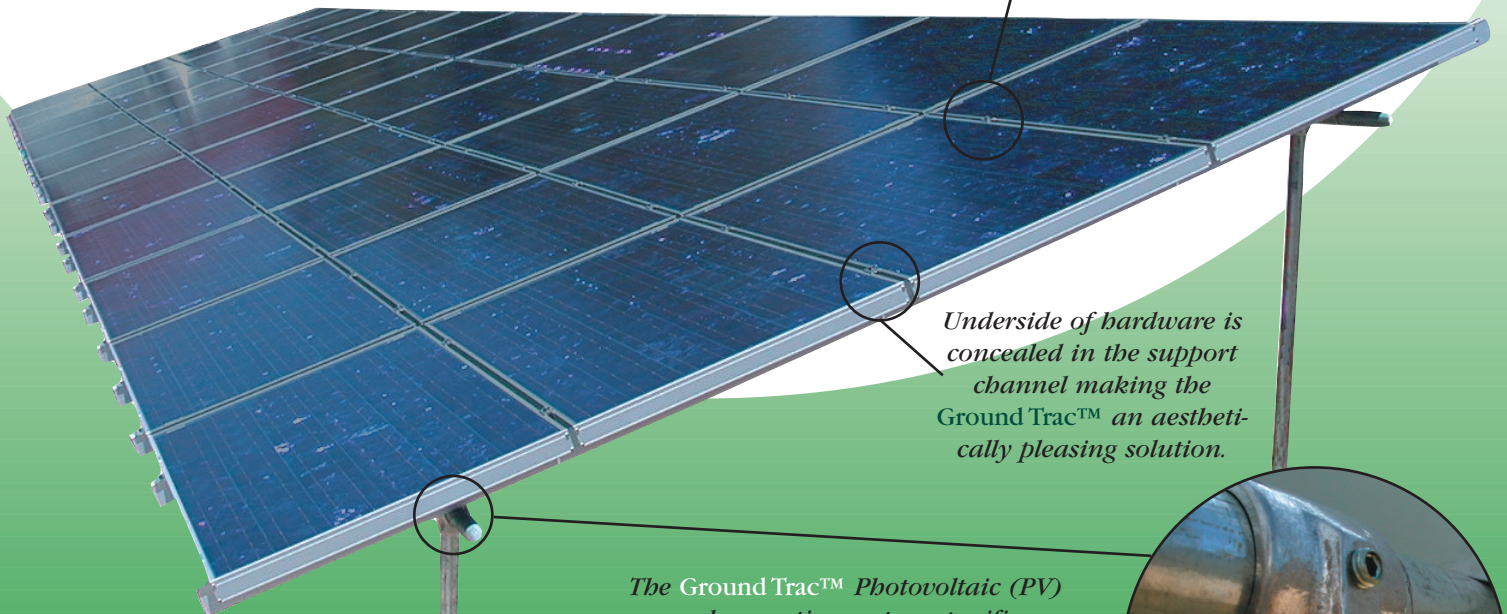

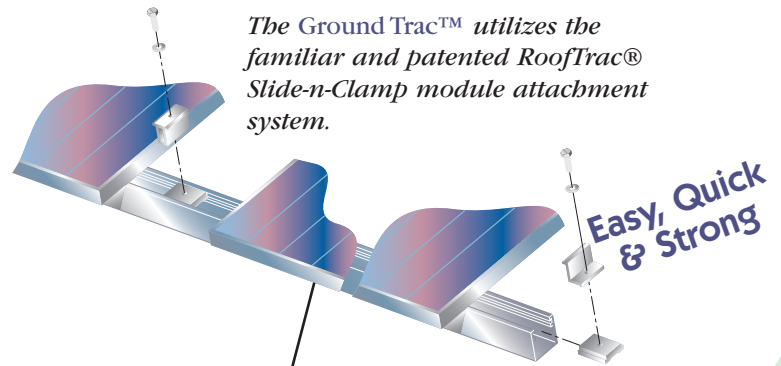

- **Extremely fast installation** - *Greatly reduces labor costs.*
- **Aesthetically pleasing** - *All attachment hardware is concealed within channel for an attractive and clean appearance.*
- **Anodized Aluminum** - *All exposed aluminum is fully anodized.*
- **Fully engineered** - *Engineered to 100mph wind load utilizing schedule #40 1-1/4" pipe.*

The **GroundTrac™** system provides an aesthetically pleasing solution for mounting PV modules on hillsides and flat ground, creating the perfect solution for well pumping and communication applications.

The **GroundTrac™** system is a great solution in rural areas or where a roof mounted system would not be possible.

### Suggested Ground Trac™ Applications:

Well Pumping  
Communications  
Commercial (rural)  
Residential (rural)

2 cubic ft.  
concrete  
footing

The Ground Trac™ Photovoltaic (PV) ground mounting system specifies Schedule #40 1-1/4" Galvanized pipe for easier transport of materials to the job site.
