

# SIEMENS

"The Power to Go Anywhere"

- 100 watts of clean, quiet solar power
- Reliable 12-volt battery charger
- Generates 22 to 26 amp-hours per day
- 25-year limited module power warranty

## Marine Power Kit 100

SOLAR BATTERY CHARGER

### Clean. Quiet. Dependable.

Enjoy all the benefits of solar power with an easy-to-install, simple-to-use Marine Power Kit from Siemens Solar. Marine Power Kits give you the freedom to escape from crowded marinas and noisy generators with your own independent power source fueled by the sun.

### How does it work?

No advanced degree is required. The science of the Marine Power Kit is really simple: the more sunlight the solar panel can absorb, the more power your system can provide. The Siemens Solar panel is highly efficient and produces electricity in as little as 10% of full sunlight. Whenever **the sun shines on the panel, electricity is produced** and fed into your vessel's 12-volt battery.

### What can be powered?

The 100 watt Marine Power Kit will generate approximately **22 to 26 amp-hours per day** if exposed to 4 to 5 hours of full sunlight.\* That's enough power for DC appliances, such as:

- microwave
- AM/FM radio
- ventilation fans
- fluorescent lights
- TV / VCR
- water pumps
- navigational equipment

### Is this a reliable power system?

The Marine Power Kit is designed and manufactured by Siemens Solar, uniformly recognized as one of the world's largest manufacturer of solar energy panels. Siemens Solar is an ISO 9001-certified manufacturer and stands behind its Marine Power Kits with a

**25-year limited power warranty on the solar module.**

Count on the Marine Power Kit 100 for reliable battery charging and  
*The Power to Go Anywhere.*

\* Power generation may vary due to the position of your vessel and the time of year.

### Is this a complete power system?

The Marine Power Kit provides you with **everything you need** to install your own efficient, reliable solar power system and begin generating electricity. The heart of the kit is the 100-watt, 5.6 amp high efficiency solar panel which converts sunlight into direct current (DC) electricity. A charge controller keeps your batteries fully charged, and at the same time, protects them from overcharging. The solar panel is fully tested and approved by Underwriters Laboratories (UL). The complete Marine Power Kit includes mounting hardware, wiring and directions you need for a trouble-free and sturdy installation. Once your system is installed, you're ready to go anywhere—just add sunlight.

### Need more power?

For **more power**, add on one additional easy-to-install Marine Power Kit 100 Expansion kit (available in 100-watt units).

The Siemens Solar Marine Power Kit 100 is backed with a 25-year limited power warranty on the solar module. A 5-year warranty applies to all other kit equipment.
